ASH Wayfinder — QR Code Posting Guide

Physical placement reference for the 30 printed QR anchor codes

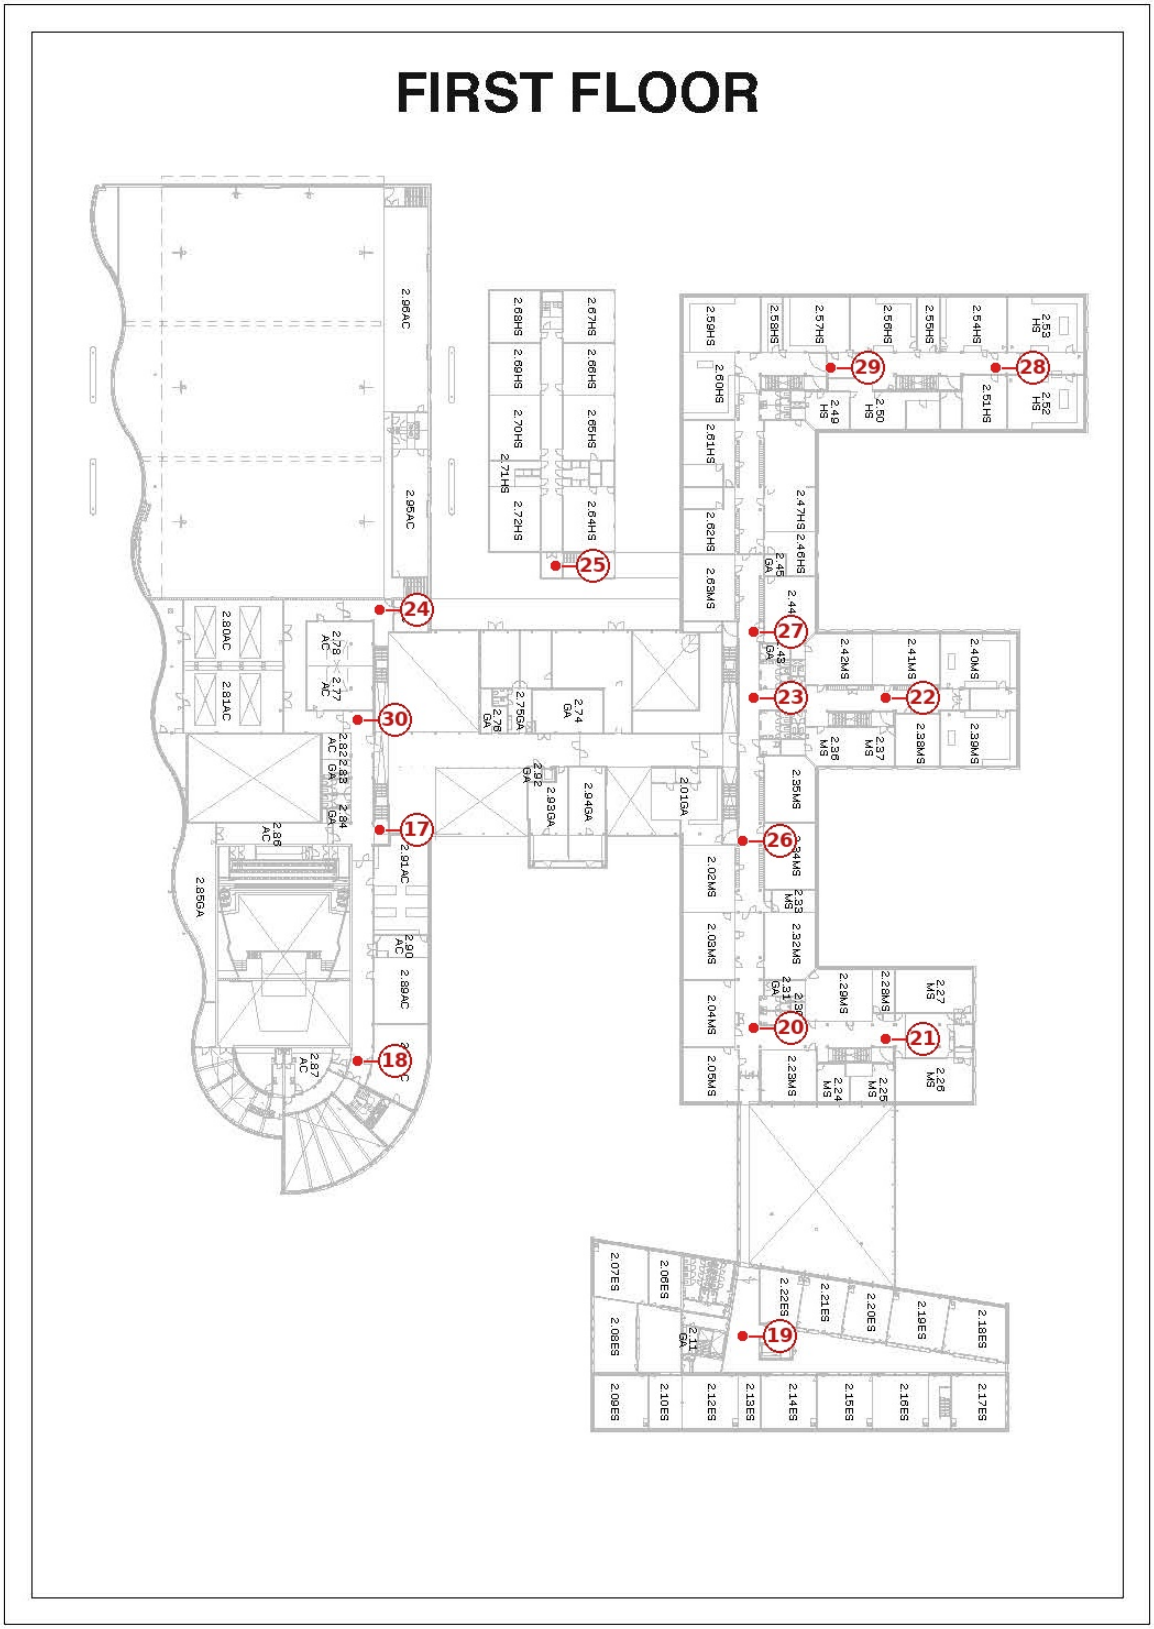

Each pin on the following floor maps marks the exact spot an anchor point was tagged in the waypoint editor — that is where the corresponding QR code (from **qr-codes/ASH_Wayfinder_QR_Codes.pdf**) should be posted, at eye level where someone arriving at that spot can scan it immediately. Match a pin to a printed page using its number below, which is cross-referenced to the QR page's bold heading and the small "id:" line printed under each code.

Scanning a posted code pre-fills that location as the visitor's starting point in the app, so placement accuracy matters more than aesthetics — post it facing the direction someone naturally approaches from, not tucked around a corner.

Ground Floor — pins 1–16

First Floor — pins 17–30

QR Code List
